

1: Key Ideas and Issues

John H Maindonald

April 3, 2018

Ideas and issues illustrated by the graphs in this vignette

Ideas and issues that the graphs given here are designed to illustrate can be summarized under the headings:

- Data Issues
 - Data Exploration
 - Source/target issues
 - Data validity, accuracy and relevance
- Models and Model Assumptions
 - Model assumptions
 - Least squares, maximum likelihood and Bayesian estimation
 - Simulation from an assumed model
 - Model diagnostics
 - Weighting biases – problems for interpretation of model parameters

1 R Functions for Creating Chapter 1 Figures

```
fig1.1 <-  
function (form = depression ~ weight, data = roller, ...)
