

Effects of a 10-unit increase in PM10 along lags

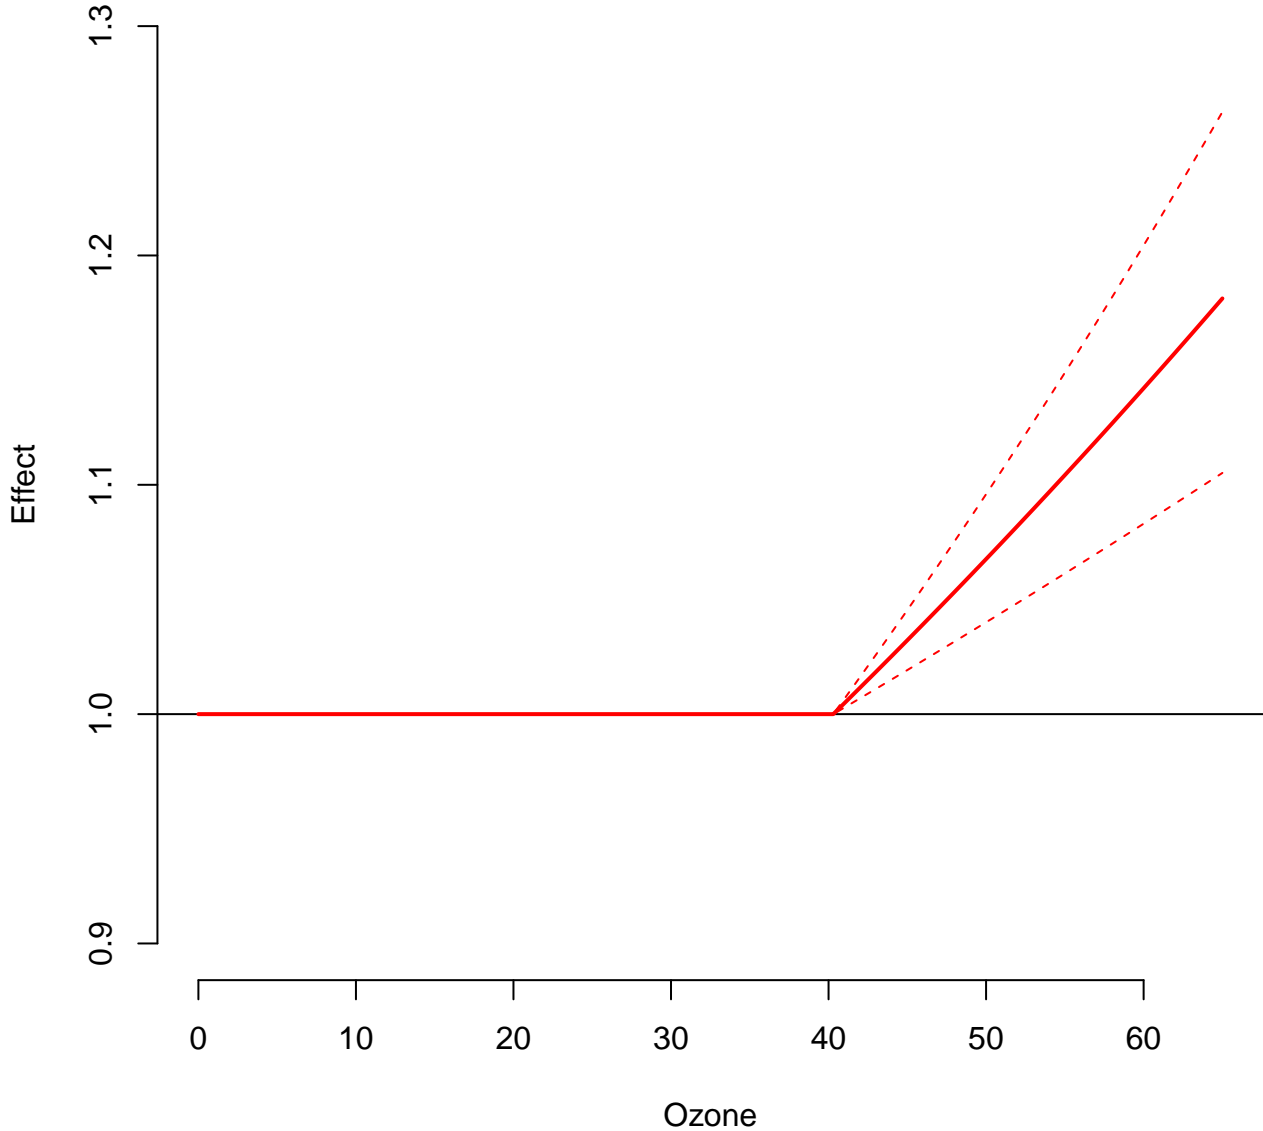

Cumulative effects of a 10-unit increase in PM10 along lags

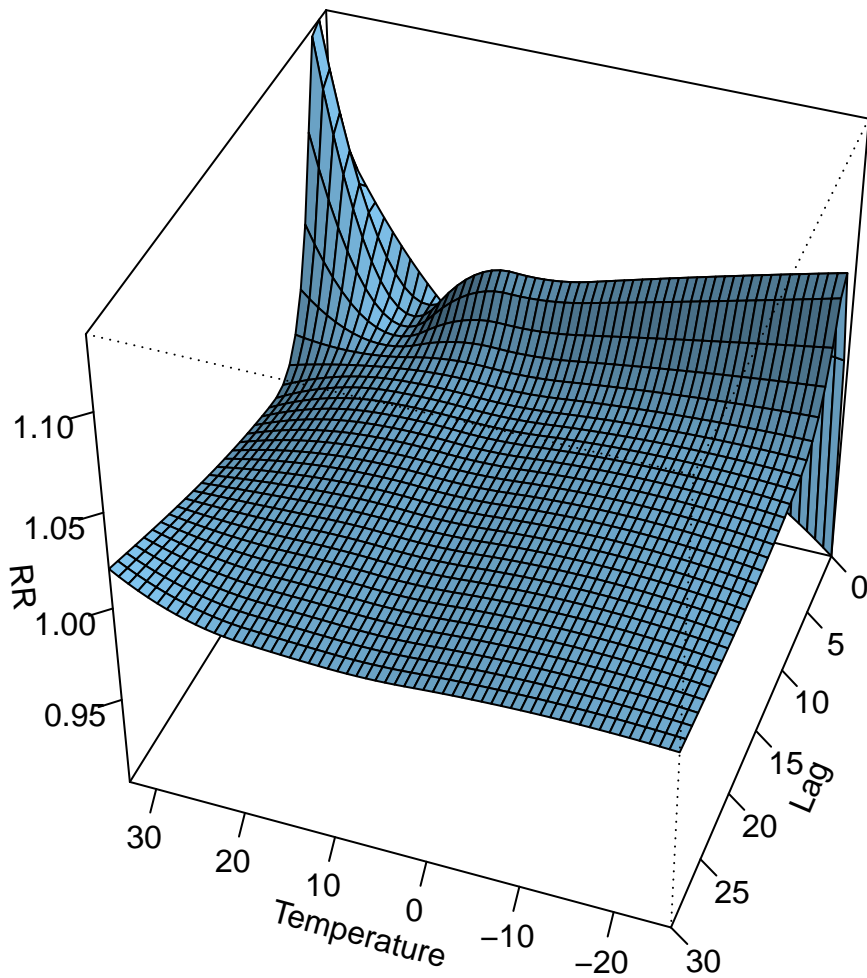

Effects of 10-unit increase above the threshold (80%CI)

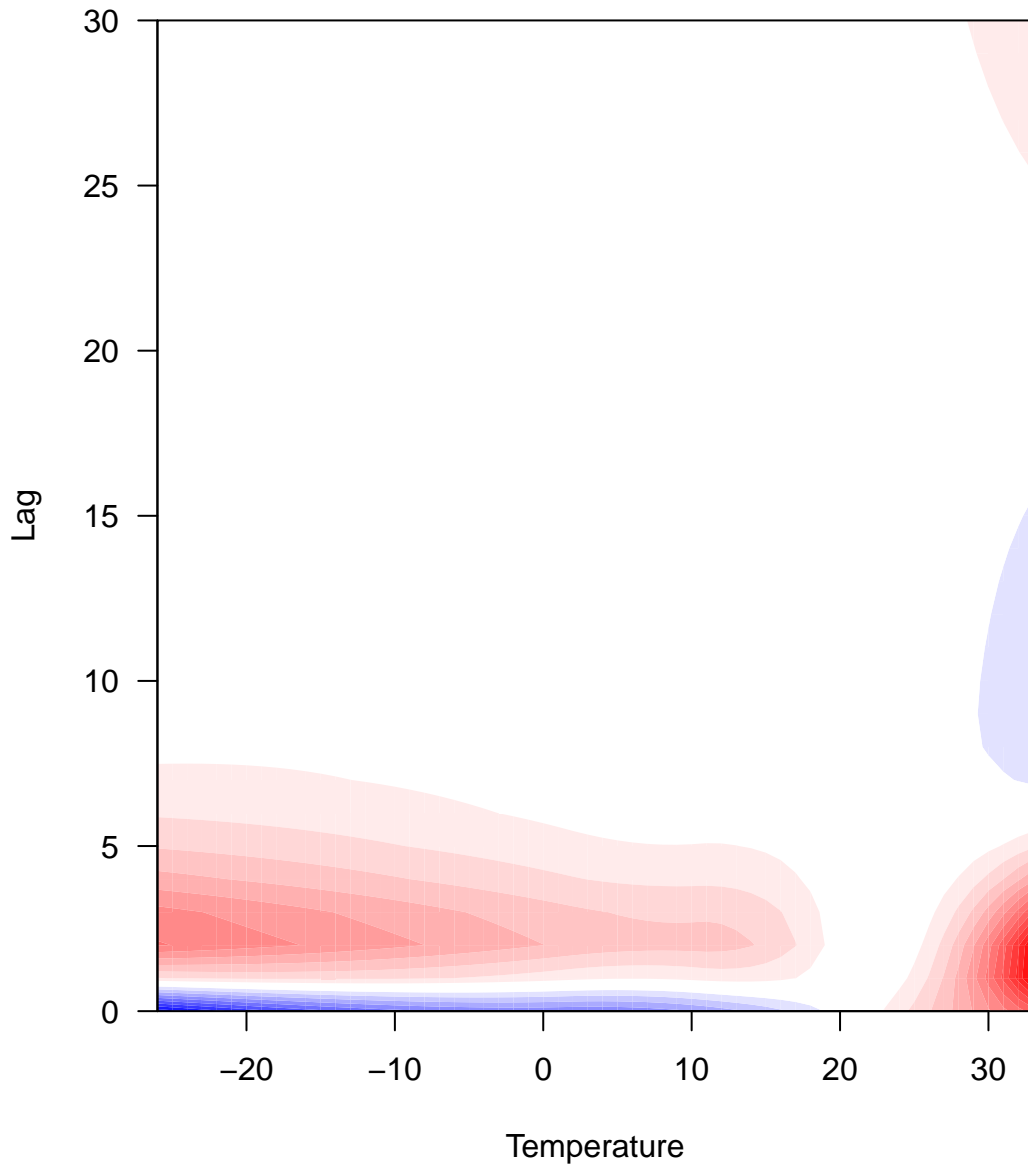

Overall effect over 5 days of lag (80%CI)

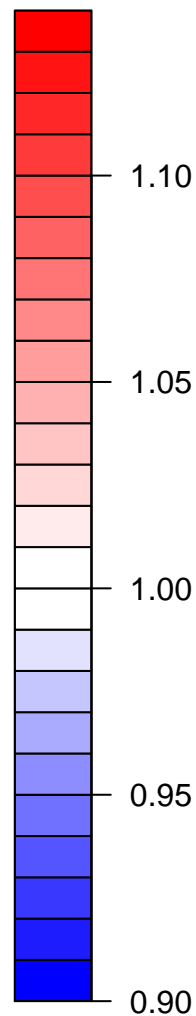

3D graph of temperature effect

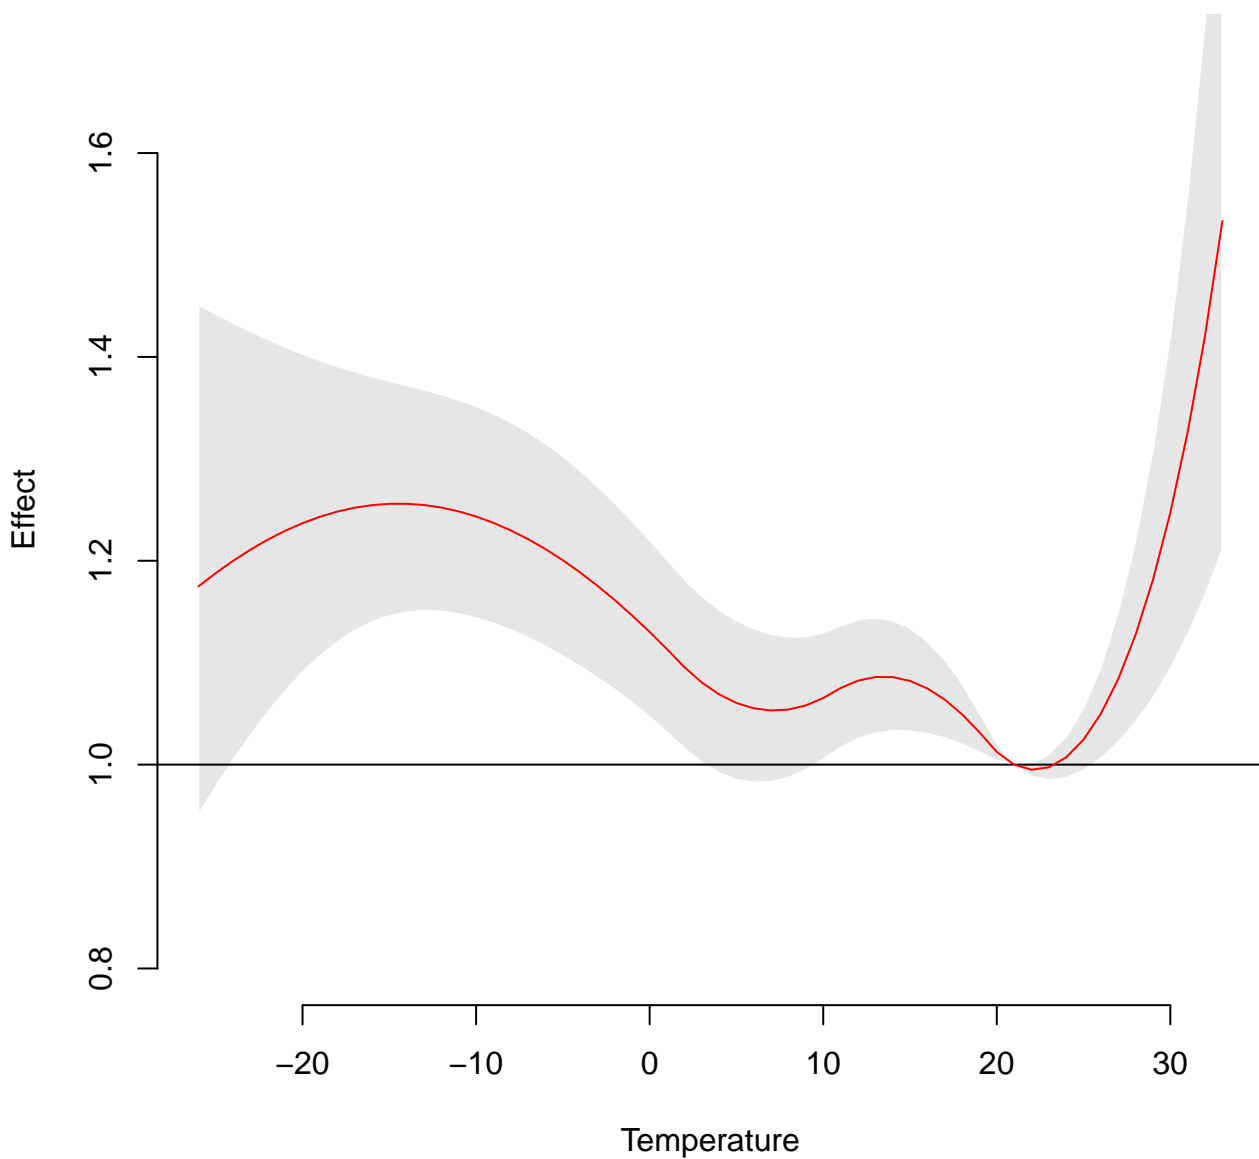

Contour plot

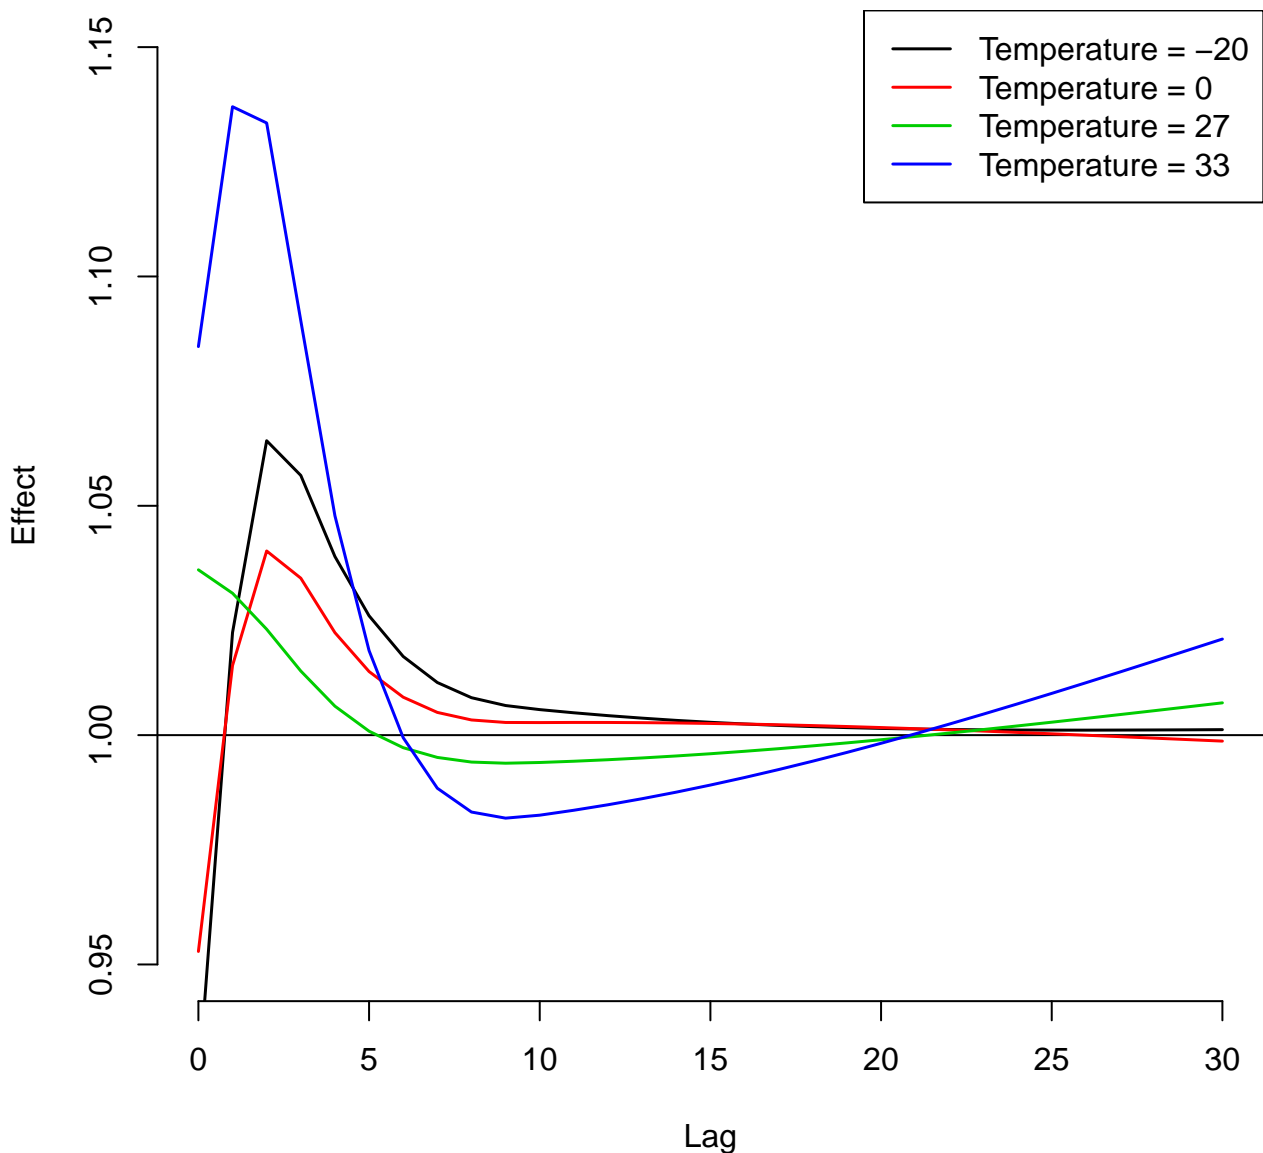

RR

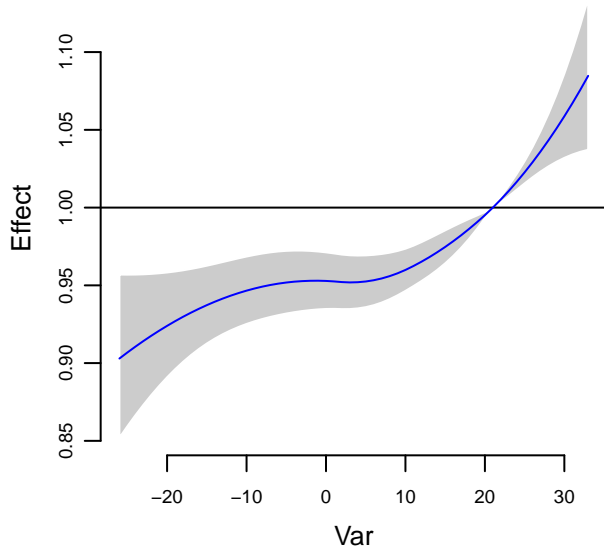

Overall effect of temperature over 30 days of lag

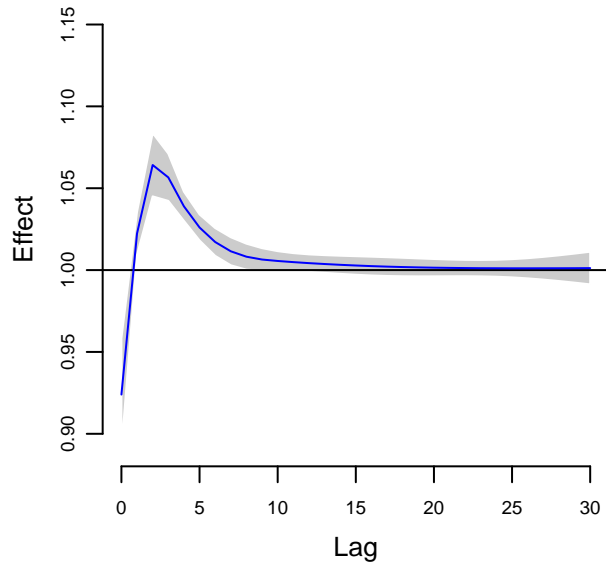

Lag-specific effects at different temperature, ref. 21C

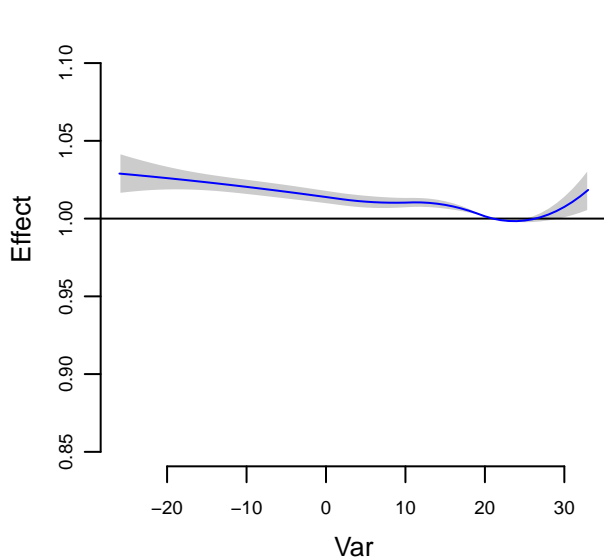

Lag = 0

Var = -20

Lag = 5

Var = 33
