

R PermutedLinearStatistic

```
graph LR; A[R PermutedLinearStatistic] --> B[C PermutedLinearStatistic]; A --> C[ncol]; A --> D[nrow];
```

The diagram illustrates the relationships between the R PermutedLinearStatistic object and its associated C PermutedLinearStatistic object and dimensions. The R PermutedLinearStatistic object is represented by a gray box on the left. Three blue arrows originate from its right side: one points to the C PermutedLinearStatistic object (a white box) positioned above and to the right, another points to the ncol variable (a white box) positioned to the right, and a third points to the nrow variable (a white box) positioned below and to the right.
