

sys/types.h

stdexcept

user.h

```
graph BT; user.h --> sys_types_h[sys/types.h]; user.h --> stdexcept;
```

The diagram illustrates a header file dependency. At the bottom, a black box labeled 'user.h' has two blue arrows pointing upwards. One arrow points to a white box labeled 'sys/types.h' on the left, and the other points to a white box labeled 'stdexcept' on the right. This indicates that 'user.h' includes both 'sys/types.h' and 'stdexcept'.
